*Mysteries of Sound, Angelic Alliance, Letters, Numbers,
and Colors Vivify Healing*

Excerpts from the book to be released at the end of 2014:

Light and Dark, Sound and No Sound, Harmony and Chaos, Love and Anger, all of these powers are within us, and of course, much more. To maintain their balance is to heal our selves.

I have had the good fortune to have “heard the call” to heal, teach, and above all to expand my awareness of my personal self and the Universe. From the age of 2 years old, I have been guided by Divine impressions, guardians, visions, and incredible channeled information. I have been led down many paths to heal myself and others. Often, it has simply been under the venue of Spiritual counseling and Shamanic practices. Over the years it has expanded to Radiant Energy uses, mystical healing through sound, color, angelic assistance, symbols, numbers in letters and Universal Laws. I have been taught by Masters within the realm of Spirit, as well as Masters in the Human realm. I’ve been compelled to share what I learn. I do this in the hopes that many individuals, as well as healers, will use the modalities and increase the power of harmonious energy fields within their self and throughout our world. I believe this will cause a 2/3rds majority of the human field of conscious energy to tip the scale from negative output and attitudes to a stable and fundamentally positive output and concordant attitudes that stir balance for our collective family.

This book, *Codes of Healing*SM, stems from inspiration directed to me through several sequences of dreams. It is always awe-inspiring to awaken within a dream and realize a sacred gift is being presented. In one dream, the Divine Feminine (whom I call WomanSpirit), was displaying sounds encoded in an octagon with Hebrew letters, in color, and a variety of other symbols SHE translated through the healing sounds of Tuning Forks. SHE revealed the Sounds of the Universe in symphony integrated with Matter and the subtle energies we explore while in our human existence: Emotions, Mental awareness, Ego activity, Soul inspiration, Physical expression and Spiritual Overlays of Sacred Containment. In the first dream SHE presented *Codes of Healing*SM with Hebrew letters, prayers and mantras that could be placed on a human body and instigate healing and balance. In sequential dreams, SHE presented 100's of codes to help the harmonious vibration of every possible event in our lives. All of the information SHE presented were vibrations activated through the use of Tuning Forks, stimulating overtones for the right vibrations to create balance for

different imbalances. I made HER a promise I would put the information together, write a book, present it to students and to those within our world who are interested, ready and also desirous to fulfill HER call to health, harmony, and peace for humanity.

A *Code of Healing* is the use of tuning forks in conjunction with a visual technique and affirmations to stir one's nature into active healing and balance. A modality is created for specific maladies. The visual quality is the use of Hebrew Letters contained within an Octagon of color. The visual is a view of symbols to simply meditate on for a few minutes; and also as a "reading" picture, viewing each portion from right to left and then within the center. Reading the affirmation silently or out loud, encourages another step in releasing the code of healing. Tuning forks are the final stage in activating the whole healing process. Wisdom teachers have known for centuries that symbols, colors and sound stimulate the encoded energy and the knowledge locked within our personal and collective unconscious is released when we contemplate, visualize and listen.

On the following pages are *Codes of Healing*. One is for a Soul Retrieval. The other is a Code for the Lottery. A group of students are working on aligning their Spiritual Abundance through the channel of the Lottery. I thought it might be fun for everyone.

Code of Healing - Lottery Abundance

Affirmation: From the *Well of Allness* I create the power to accept financial abundance that is available to me. I take the risk to mentally, emotionally and physically change from limited acceptance to unlimited acceptance of financial abundance. I fully accept the gift of a large supply of money from the Holy Spirit. I am the container for money to materialize in my world. I AM the fountain for the flow of universal abundance. My fountain is connected to me in many ways and as I fill with universal abundance I let it spill over into my human endeavors. I gracefully use the gift so I may show appreciation to the Source.
